

Workshop - Next steps

- contract led
 - Contract defines relationships
 - sessions uses contract
- Goal till mid of April: Use Case "Contract billable" via API
- Steps:
 - clarify roles (customer, supplier, end-user)
 - Customer and supplier can be both?
 - New DocType to link customer and supplier
 - Define + create DocType
 - contract
 - single sessions
 - supplier
 - API endpoints + mapping
 - start import via API
 - contract or customer?
 - sessions
 - restructure consumption data to patch, collect via single sessions
- General integration:
 - architecture
 - logging
 - gridware integration
 - One place to manage all of the functionalities
